TOPAS® Cyclic Olefin Copolymers

1: Identification

Product Identifier

Identification of the substance/preparation

TOPAS® Cyclic Olefin Copolymers

Recommended uses and restrictions on use

Use of the Substance / Preparation

injection molding articles for optical industry, 3-D Printing, packaging Industry, medical articles.

Supplier information

Supplier

Polyplastics USA, Inc.
27240 Haggerty Road, Suite E-20
Farmington Hills, MI 48331
United States

Product Information

e-mail: info@topas.com

Emergency telephone number

in USA, call 800 424 9300
outside USA, call +1.703.527.3887, collect calls accepted available 24/7

2. Hazards identification

2.1. Classification of the substance or mixture

This substance is not hazardous in accordance with paragraph (d) of §1910.1200 (GHS-US classification).***

OSHA Specified Hazards

Not applicable.

2.2. Label elements

Not required according to §1910.1200 (GHS-US labeling).

2.3. Other hazards

None known

3. Composition / Information on ingredients
TOPAS® Cyclic Olefin Copolymers

Chemical characterization
contains ethylene-norbornene copolymer (CAS 26007-43-2)

Remarks
The following specific grades of TOPAS are covered by this MSDS:
5013L-10; 5013S-04; 6013M-07; 6013S-04; 6015S-04; 6017S-04; 8007S-04; 8007X10

4. First aid measures

Description of first aid measures

General advice
Remove/Take off immediately all contaminated clothing. Wash/Decontaminate removed clothing before reuse.

Inhalation
Aerate with fresh air. When symptoms persist or in all cases of doubt seek medical advice.

Eyes
Resin particles, like other inert materials, are mechanically irritating to eyes. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Obtain medical attention.

Skin
Cool skin rapidly with cold water after contact with molten polymer. If polymer is stuck to skin, do not remove. Allow adhered polymer to come off naturally. Removal of adhered polymer may result in more tissue damages than if polymer is allowed to come off over time. When symptoms persist or in all cases of doubt seek medical advice.

Ingestion
Do not induce vomiting without medical advice. Obtain medical attention.

Most important symptoms and effects, both acute and delayed

Main symptoms
None known.

Advice for the rescuer

Special note for doctor
This product is essentially inert and non-toxic. Under conditions of thermal decomposition irritant gases may be formed. Exposed patients may need to have their arterial blood gases and carboxyhemoglobin levels checked

5. Firefighting measures

Extinguishing media
Suitable extinguishing media
water spray, foam, dry chemical, carbon dioxide (CO2).
TOPAS® Cyclic Olefin Copolymers

Unsuitable Extinguishing Media
Do not use a solid water stream as it may scatter and spread fire.

Special hazards
Under conditions giving incomplete combustion, hazardous gases produced may consist of:
- carbon monoxide (CO)
- carbon dioxide (CO2)
Combustion gases of organic materials must in principle be graded as inhalation poisons

Fire precautions and protective measures
Cool closed containers exposed to fire with water spray
Keep people away from and upwind of fire
Dike and collect water used to fight fire

Special protective equipment for firefighters
Fire fighter protection should include a self-contained breathing apparatus (NIOSH-approved or EN 133) and full fire-fighting turn out gear.

6. Accidental release measures

Personnel precautions, protective equipment and emergency procedures

Personal precautions
Avoid contact with skin and eyes. Do not breathe dust. Keep people away from and upwind of spill/leak.
For emergency responders: Personal protection see section 8.

Environmental precautions
Not readily biodegradable. Should not be released into the environment. Do not flush into surface water or sanitary sewer system.

Methods and material used for collection and disposal of leak

Methods for containment
Stop the flow of material, if possible without risk.

Methods for cleaning up
Sweep up and shovel into suitable containers for disposal. Like most thermoplastic plastics the product can be recycled. Dispose of in accordance with local regulations.

Precautionary measures to prevent the occurrence of secondary disasters

7. Handling and storage

Handling
TOPAS® Cyclic Olefin Copolymers

Advice on safe handling
Do not handle hot or molten material without appropriate protective equipment. Do not exceed recommended process temperatures to minimize release of decomposition products.

Hygiene measures
Wash hands before breaks and immediately after handling the product. Take off all contaminated clothing immediately.

Advice on the protection of the environment
See Section 8: Environmental exposure controls.

Incompatible products
No special restrictions on storage with other products.

Storage

Advice on protection against fire and explosion
Keep away from sources of ignition - No smoking. Take measures to prevent the build up of electrostatic charge. Dust can form an explosive mixture in air. Risks of ignition followed by flame propagation or secondary explosions shall be prevented by avoiding accumulation of dust, e.g. on floors and ledges.

Technical measures/Storage conditions
Keep away from direct sunlight. Keep containers tightly closed in a dry, cool and well-ventilated place.

8. Exposure controls / Personal protection

Exposure limits United States of America

US OSHA Z-1

US NIOSH IDHL

Appropriate Engineering controls
Ensure adequate ventilation. Provide for appropriate exhaust ventilation and dust collection at machinery.

Personal protective equipment

General industrial hygiene practice
Avoid contact with skin, eyes and clothing. Do not breathe dust or mist. Ensure that eyewash stations and safety showers are close to the workstation location.

Hygiene measures
Wash hands before breaks and immediately after handling the product. Take off all contaminated clothing immediately.

Respiratory protection
Based on workplace contaminant levels and working limits of the respirator, use a respirator approved by NIOSH.
TOPAS® Cyclic Olefin Copolymers

**Hand protection**
Heat resistant gloves.

**Suitable material**
leather gloves

**Eye protection**
Tightly fitting safety goggles.

**Skin and body protection**
Wear face-shield and protective suit for abnormal processing problems.

**Thermal Hazard**
When handling hot material, use heat resistant gloves. Heat only in areas with appropriate exhaust ventilation.

#### 9.2. Other information

**VOC Content(%)**
< 0.5 % (wt/wt)
10. Stability and reactivity

Reactivity
The reactivity of the product corresponds to the typical reactivity shown by the substance group as described in any textbook on organic chemistry.

Chemical stability
Stable under normal conditions of handling, use and transportation.

Possibility of hazardous reactions
Hazardous polymerisation does not occur.

Conditions to avoid
Avoid temperatures above 350 °C / 662F. Risk of decomposition.

Incompatible materials
oxidizing agents.

Hazardous decomposition products
Thermal decomposition can lead to release of irritating gases and vapours.

11. Toxicological information

Main symptoms
None known

Note
No toxicology information is available. Handle in accordance with good industrial hygiene and safety practice.

12. Ecological information

Ecotoxicity
No data available

Persistence/Degradability
No data available

Bioaccumulative potential
SAFETY DATA SHEET

TOPAS® Cyclic Olefin Copolymers

No data available

**Mobility in soil**

No data available

**Other Adverse Effects**

No data available

**Note**

No information on ecology is available. According to our experience and to the information provided to us, the product does not have any harmful effects if it is used and handled as specified.

### 13. Disposal considerations

**Product Information**

Where possible recycling is preferred to disposal or incineration. May be taken to waste disposal site or incineration plant, with household waste. Rules of the local authorities must be observed.

**Uncleaned empty packaging**

Regulations concerning reuse or disposal of used packaging materials must be observed.

### 14. Transport information

- **ICAO-TI / IATA-DGR**: Not restricted
- **IMDG**: Not restricted
- **D.O.T. (49CFR)**: Not restricted

### 15. Regulatory information

**OSHA Regulatory Status**

This material is non-hazardous as defined by the American OSHA Hazard Communication Standard (29CFR 1910.1200).

**Federal Regulations**

This product complies with U.S. Toxic Substance Control Act (TSCA)

It is listed on the active inventory list via the 2018 reset rule
TOPAS® Cyclic Olefin Copolymers

The products covered by this SDS are permitted under the following inventories:
TSCA (US)
AICS (AU)
KECI (KR)
DSL (CA)
IECSC (CN)
EINECS (EU)
ENCS (JP)
NZIoC (NZ)
TCSI (TW)

16. Other information

Revision Date 22-Jun-2019
Issuing date 05-Aug-2019

Training advice
For effective first-aid, special training / education is needed.

Hazard Rating Systems

NFPA (National Fire Protection Association)
- Health Hazard 1
- Fire Hazard 1
- Reactivity 0

HMIS (Hazardous Material Information System)
- Health Hazard 0
- Flammability 1
- Physical Hazard 0

Sources of key data used to compile the datasheet
Information contained in this safety data sheet is based on TOPAS owned data and public sources deemed valid or acceptable. The absence of data elements required by OSHA, ANSI or Annex II, Regulation 1907/2006/EC indicates, that no data meeting these requirements is available.

Further information for the safety data sheet
For more information, consult the Technical Data Sheet (www.topas.com). Changes against the previous version are marked by ***.

Disclaimer
The information contained herein is accurate to the best of our knowledge. We do not suggest or guarantee that any hazards listed herein are the only ones which exist. TOPAS Advanced Polymers, Inc. makes no warranty of any kind, express or implied, concerning the safe use of this material in your process or in combination with other substances. Effects can be aggravated by other materials and/or this material may aggravate or add to the effects of other materials. User has sole responsibility to determine the suitability of the materials for any use and the manner of use contemplated. User must meet all applicable safety and health standards.
